# Nguyen Van Nhat

## Software Engineering

**EDUCATION**

**Phenikaa University | 2023–2026**

Software Engineering
- GPA: 3.5
- Academic encouragement scholarship

---

**SKILLS**

- **Tech stack:** Java/Spring Boot, React.js, Redux/Redux toolkit, MySQL, PostgreSQL, Docker, AWS (EC2, RDS), Git

- **Programming Languages:** Java, Javascript ( Other : HTML, CSS, C/C++ )

- **Language**: English ( Able to read and understand technology documents )

---

**PROJECTS**

### E–Commerce Platform

A full–featured online marketplace built with a React frontend and Spring Boot backend, engineered to deliver a seamless shopping journey. The platform covers the full spectrum of e-commerce operations, from browsing and selecting items to after–sales assistance.

- **Frontend**: React + TypeScript, React Router, React Query, Mantine UI
- **Backend**:  Spring Boot, JPA/Hibernate, MySQL, Spring Security (JWT), MapStruct, Lombok, WebSocket, PayPal, GHN, SMTP.
- **Deploy**: VPS selfhost, CI/CD pipeline, Docker/Docker hub.

### Habit Tracking site

A comprehensive habit tracking and productivity management system built with React.js and Node.js.
 Features include daily habit logging, goal progress visualization, reminder notifications, and user performance analytics.

- **Frontend**: Reactjs, Redux, Ant Design.
- **Backend**: Spring Boot, Schedule, Postgres, Postman, Jwt, SMTP.
- **Deploy**: Docker, VPS.
